Chapter 6 — FAQs for Requesters

Quick Reference — At-a-Glance Task Guide

Chapter 1

Getting Started as a Requester

This guide is written for users who need to submit payment exception requests through ProcureGuard. As a requester, you initiate either an Adhoc PO or an Advance Payment request, then track it as it moves through the approval chain.

1.1 What is ProcureGuard?

ProcureGuard is NESR's platform for managing payment exceptions. Instead of sending emails to request a one-time vendor payment or an advance, you submit a structured request through ProcureGuard. This ensures the right people review and approve every request, and you can always see its current status.

1.2 Accessing the Platform

Open any modern browser and navigate to:

<https://scagents.nesr.com/home>

■ Bookmark this URL. The platform works best in Google Chrome or Microsoft Edge. From the home screen, click the ProcureGuard card to open the platform.

1.3 Your Role as a Requester

As a requester, you have access to the following areas of ProcureGuard:

Section	What you can do
Dashboard	See your KPI summary — pending, approved, and total request values.
My Work	View all requests you have submitted and their current status.
Adhoc POs	View the list of your own Adhoc PO requests.
+ New Adhoc PO	Submit a new Adhoc Vendor Purchase Exception request.
Advance Requests	View the list of your own Advance Payment requests.
+ New Advance Request	Submit a new Advance Payment request.

■ You will not see Analytics in your sidebar — that section is only available to approvers.

Chapter 2

Submitting an Adhoc PO Request

2.1 When to Use an Adhoc PO

Submit an Adhoc PO when you need to purchase goods or services from a vendor who is **not yet registered** in NESR's approved supplier list. This is an exception process — you must justify why you are using a non-approved vendor.

■ Always check whether the vendor exists in the approved supplier list before raising an Adhoc PO. If the vendor is already approved, use the standard procurement process instead.

2.2 Step-by-Step: Filling the Form

Click **+ New Adhoc PO** in the sidebar to open the Adhoc Vendor Purchase Exception Request form. Work through the form from top to bottom:

Step 1	Enter the Requisition Number from your SAP or internal requisition.
Step 2	Select the Country where the purchase is taking place.
Step 3	Select the Segment (your business unit — e.g. Drilling, Corporate, E&P;).
Step 4	Enter the Adhoc Vendor Name exactly as it appears on their documents.
Step 5	Enter the Vendor Tax ID.
Step 6	Select the Spend Category that best describes the purchase.
Step 7	Enter the Spend Value in USD.
Step 8	Write a clear Reason / Justification explaining why this vendor is being used.
Step 9	Attach any supporting documents (quotes, emails, approvals) — up to 10 MB each.
Step 10	Optionally add Requester Comments and Additional Request Notification emails.
Step 11	Review the 'People Getting Contacted' section — it shows who will approve this request.
Step 12	Tick the Acknowledgement checkbox to confirm this is a one-time vendor.
Step 13	Click Submit.

2.3 Form Fields Reference

Field	Notes
Requisition Number *	SAP or internal requisition number. Required.
Country *	The operating country for this purchase. Required. Selecting a country populates the approver list.

Segment *	Your business unit. Required.
Adhoc Vendor Name *	Full legal name of the non-approved vendor. Required.
Vendor Tax ID *	Vendor tax identification number. Required.
Spend Category *	Type of spend — e.g. Materials, Services. Required.
Spend Value in USD *	Total purchase value in USD. Required.
Reason / Justification *	Business justification for using a non-approved vendor. Be specific. Required.
Attachments	Quotes, approval emails, or other supporting documents. Max 10 MB per file. Optional but strongly recommended.
Requester Comments	Additional notes for reviewers. Optional.
Additional Request Notifications	Extra email addresses (comma or space separated) that will receive status updates. Optional.
Email test mode	Leave unchecked for real submissions. Testing use only.
People Getting Contacted	Auto-populated after you select a country. Shows approvers who will be notified.
Acknowledgement *	Checkbox confirming this is a one-time vendor. Required before submitting.

2.4 Submitting and What Happens Next

After you click **Submit**, your request is assigned a unique ID in the format **PG-ADH-[date]-[code]** and its status is set to **Submitted**. Here is what happens next:

When	What happens
Immediately	You receive a confirmation. The SCM Manager is notified by email.
SCM Manager reviews	The SCM Manager opens the request. Status changes to Under Review. You receive an email.
SCM approves	Status moves to Approval by SCM. The Supply Chain Director is notified.
Supply Chain Director approves	Status changes to Approved. You receive an approval notification.
If rejected at any step	You receive a rejection email with the reviewer's comment. You can raise a new request if needed.

Chapter 3

Submitting an Advance Payment Request

3.1 When to Use an Advance Payment

Submit an Advance Payment request when NESR needs to pay a vendor **before goods or services are delivered**. This typically occurs when a vendor requires a deposit or prepayment as a condition of their contract.

■ Advance Payments carry financial risk because payment is made before delivery is confirmed. Always include a clear business justification and attach supporting documents such as the vendor's pro-forma invoice or contractual requirement.

3.2 Step-by-Step: Filling the Form

Click **+ New Advance Request** in the sidebar to open the form:

Step 1	Enter the Requisition Number.
Step 2	Enter the Vendor name or SAP Vendor ID.
Step 3	Select the Country where the payment will be made.
Step 4	Select the Segment (business unit).
Step 5	Select the Spend Category.
Step 6	Enter the Spend Value in USD.
Step 7	Enter the Payment Terms Days (e.g. 30, 50, 90).
Step 8	Enter a clear Reason / Justification for the advance payment.
Step 9	Attach supporting documents — pro-forma invoice, vendor request, contract extract, etc.
Step 10	Optionally add Requester Comments and Additional Notification emails.
Step 11	Review the 'People Getting Contacted' section.
Step 12	Click Submit.

3.3 Form Fields Reference

Field	Notes
Requisition Number *	SAP or internal requisition number. Required.
Vendor *	Vendor name or SAP Vendor ID. Required.
Country *	Country where the payment is being made. Required.
Segment *	Your business unit. Required.

Spend Category *	Type of spend. Required.
Spend Value USD *	The advance amount in USD. Required.
Payment Terms Days	How many days until final payment is due after advance. Optional.
Reason / Justification *	Why an advance is required. Be specific and reference any contractual obligation. Required.
Attachments	Pro-forma invoice, vendor request, or contractual documents. Max 10 MB per file.
Requester Comments	Optional notes for reviewers.
Additional Request Notifications	Extra emails to receive status updates. Optional.
Email test mode	Leave unchecked for real submissions.
People Getting Contacted	Auto-populated after selecting country. Shows the full approval chain.

3.4 Submitting and What Happens Next

After submitting, your request is assigned a unique ID in the format **PG-ADV-[date]-[code]**. Advance Payments go through a longer chain than Adhoc POs:

Stage	What happens
Submitted	You receive a confirmation. Country Finance Controller is notified.
Country Finance Review	Country Finance Controller reviews. Status: Under Review.
Supply Chain Director Review	After country controller approval.
Treasury Director Review	Treasury Director reviews funding and timing.
Corporate Controller Review	Corporate Controller checks CFO threshold.
Approved	You receive an approval confirmation email.
If rejected at any step	You receive a rejection email with the reviewer's comment.

Chapter 4

Tracking Your Requests

After submitting a request, you can monitor its progress at any time through several sections of the platform.

4.1 My Work Page

The **My Work** page (Sidebar → My Work) is your personal view of all requests you have submitted. Each row shows the request ID, type, current status, priority, vendor, amount, and the date it was created. Click any row to open the full detail.

4.2 Request Status List

The status badge on your request tells you exactly where it is:

Submitted	Your request has been received and is waiting for the first reviewer to open it.	No action needed. Wait for the first reviewer.
Under Review	A reviewer has opened your request and is actively reviewing it.	No action needed. You will be notified of the outcome.
Approved	All approvals are complete. Your request has been fully approved.	Finance team will process payment. No further action from you.
Rejected	A reviewer rejected your request.	Read the rejection reason in the email. Raise a new request if needed.
Cancelled	The request was cancelled.	Contact your SCM Manager if you believe this was in error.

4.3 The Adhoc PO Status Page

Navigate to **Adhoc POs** in the sidebar to see the full status list of your Adhoc PO requests. Three summary cards at the top show: total requests submitted, how many are pending review, and the total USD value. The table below lists each request with its vendor, amount, status, country, and a View button.

■ Use the search bar to find a specific request by vendor name, request ID, or country. Use the filter dropdowns to narrow by status or other criteria.

4.4 The Advance Payments Status Page

Navigate to **Advance Requests** in the sidebar to see all your Advance Payment requests in the same format — summary cards plus a searchable, filterable table.

4.5 Opening a Request Detail

Click the **View** button on any request row to open the full detail page. As a requester, the detail page shows you:

Section	What you see
---------	--------------

Request ID & header	The unique ID, vendor name, and amount at the top of the page.
Amount cards	Original amount, USD equivalent, created date, and last updated date.
Approval Chain panel	The right panel shows every step in the chain. The current active step is highlighted.
Vendor & Requester section	Your requisition number, vendor details, country, segment, and accounting information.
Advance Details section	Your reason/justification and any attachments you uploaded.
Activity log	A chronological log of every status change and action taken on this request.

■ You cannot approve, reject, or modify a request once it has been submitted. If you need to make a change, contact your SCM Manager.

Chapter 5

Email Notifications

ProcureGuard sends you automated email notifications at key points in your request's lifecycle. You do not need to log in to check status — the emails keep you informed. However, all actions must be taken inside the platform.

5.1 What Emails You Will Receive

Email	When you receive it
Submission confirmation	Sent immediately after you submit a request. Confirms your request ID and the first reviewer.
Status changed to Under Review	Sent when a reviewer opens your request and begins reviewing it.
Request approved	Sent when all approval steps are complete.
Request rejected	Sent if any reviewer rejects your request. Includes the reviewer's comment.
Status updates (if added)	If you added yourself or others to 'Additional Request Notifications', those addresses receive all requester-side status emails.

■ Do not reply to ProcureGuard notification emails — they are automated and unmonitored. If you need to follow up, contact the reviewer or your SCM Manager directly.

5.2 Email Test Mode

On the request submission form, there is an **Email test mode** checkbox inside a yellow panel. **Leave this unchecked** when submitting real requests. When test mode is enabled, actual approvers and notification recipients will not receive emails — only designated test addresses will.

Chapter 6

Frequently Asked Questions

Q: My request has been 'Submitted' for a long time. What should I do?	A: The first reviewer (SCM Manager for Adhoc POs, Country Finance Controller for Advance Payments) has not yet opened the request. Contact your SCM Manager directly and reference your request ID.
Q: I made an error on my form after submitting. Can I edit it?	A: No. Once submitted, a request cannot be edited. Contact your SCM Manager or the ProcureGuard SCM Manager to cancel the request, then raise a new one with the correct information.
Q: I was rejected. Can I resubmit?	A: Yes. Read the rejection reason in the email, correct the issue (such as adding a better justification or correct documentation), and submit a brand new request.
Q: How do I know who will approve my request?	A: After selecting the Country on the form, the 'People Getting Contacted' section will populate with the approver names and roles. You can also see the full approval chain on the request detail page.
Q: Can I add someone to receive email updates on my request?	A: Yes. Use the 'Additional Request Notifications' field on the form to add email addresses. Those people will receive the same status emails you receive.
Q: My request shows 'Cancelled'. What happened?	A: A request can be cancelled by a reviewer or SCM Manager. Contact your SCM Manager and reference the request ID to understand why it was cancelled.
Q: I don't see Analytics in my sidebar. Is that a bug?	A: No. Analytics is only available to approvers. As a requester, your access is limited to your own requests and the submission forms.
Q: What is the difference between an Adhoc PO and an Advance Payment?	A: An Adhoc PO is for purchasing from a vendor not in the approved supplier list. An Advance Payment is for paying an existing approved vendor before goods or services are delivered. See Chapter 3 of the General Training Guide for full details.

Quick Reference

Task	How to do it
Submit an Adhoc PO	Sidebar → + New Adhoc PO → Fill form → Submit
Submit an Advance Payment	Sidebar → + New Advance Request → Fill form → Submit
Track your requests	Sidebar → My Work
See all your Adhoc POs	Sidebar → Adhoc POs
See all your Advance Payments	Sidebar → Advance Requests
Open a request detail	Click View on any request row
See who will approve	Select Country on form → 'People Getting Contacted' auto-populates
Understand a status badge	Chapter 4 of this guide — Request Status List
What to do if rejected	Read rejection email → correct issue → submit new request
Get help	Contact your SCM Manager
