- › Route information
- › Customs & documentation
- › Dates & deposit
- › Notifications
- › Required documents

Chapter 1

Getting Started

Before using the TI/TE platform, you need to access the website and request access for the countries you are responsible for. This chapter walks you through both steps.

1.1 Accessing the Platform

The TI/TE platform is a web-based application. Open any modern browser and navigate to:

<https://scagents.nesr.com/home>

■ Bookmark this URL for quick access. The platform works best in Google Chrome or Microsoft Edge.

1.2 Requesting Access

When you first visit the platform, you will need to request access for the countries you are responsible for. An admin will review and approve your request before you can view or manage shipments for those countries.

The image shows a 'Request Access — TI-TE' dialog box. At the top, it says 'Select the countries you need access to. An admin will review your request.' Below this is a search bar labeled 'Search countries...'. Under the search bar is a list of countries with checkboxes: Qatar, Kuwait, Oman, Bahrain, Egypt, and Algeria. At the bottom of the dialog are two buttons: 'Submit Request' and 'Cancel'.

Figure 1.1 — Request Access dialog

To request access:

- The **Request Access — TI-TE** dialog will appear when you log in without country access
- Use the **Search countries** field to find your country quickly

- Tick the checkbox next to **each country you need access to** — select your own operating country
- Click **Submit Request** — the button activates once at least one country is selected
- An admin will review your request; you will be notified once access is granted

■ Only request access for countries you are directly responsible for. Requesting unnecessary country access may delay approval.

Chapter 2

Compliance Dashboard

The Compliance Dashboard is the home screen of the TI/TE platform. It gives you a real-time snapshot of all temporary import and export movements, their compliance status, and any actions that require immediate attention.

Figure 2.1 — Compliance Dashboard (full view)

2.1 KPI Summary Cards

Four summary cards appear at the top of the dashboard, each highlighted with a colour-coded border:

Card	Colour	What it shows
Active Movements	Gray	Total open shipments (imports + exports)
Overdue	Red	Shipments past their expiry — immediate action required
Due This Week	Orange	Shipments expiring within 7 days
Customs Deposit at Risk	Green	Total USD value of open/extended shipments

2.2 Action Queue

Located in the lower-left area, the Action Queue lists shipments that need attention, sorted by days remaining until expiry. Columns include:

- Shipment # and description

- Route (origin → destination)
- Movement type badge
- Customs deposit amount (USD)
- Expiry date and days remaining
- Current status badge

■ Tip: Click **View all** in the top-right of the Action Queue to go directly to the full Shipment Register filtered by alert status.

2.3 Compliance Health Chart

The donut chart on the right shows all open shipments categorised by time remaining to expiry:

Colour	Time Bucket	Action Needed
Red	Overdue	Escalate immediately
Orange	≤ 7 days	Submit extension or initiate re-export now
Yellow	8–14 days	Begin extension paperwork
Light Blue	15–30 days	Confirm re-export plan
Blue	31–60 days	Monitor only
Green	60+ days	No action needed

2.4 By Business Segment

The bottom-left panel breaks down active movements by business segment (e.g. Drilling, Frac, WL, ESG, TRS). Each row shows the number of active shipments and the total customs deposit value for that segment, with a proportional green bar indicator.

■ Note: The **+ New shipment** button in the top-right corner of the Dashboard is the fastest way to log a new temporary movement. You can also reach it from the Shipment Register.

Chapter 3

Navigation Menu

The sidebar navigation is always visible on the left side of the screen. It organises the platform into two groups: **Navigate** (main features) and **Workspace** (configuration).

Figure 3.1 — Sidebar navigation menu

Menu Item	Description
All Tools	Quick-access launcher for all platform tools
Dashboard	Return to the Compliance Dashboard home screen
Shipments	Full shipment register — badge shows active count
Alerts	Prioritised alert list — badge shows urgent items
Map View	Global view of active movement routes
Reports	Audit-ready PDF/Excel report exports
Documents Library	Workspace: uploaded files and documents
Templates	Workspace: document and email templates
Settings	Workspace: user preferences and notification rules

■ The active page is highlighted with a green left-border and bold text in the sidebar. Notification badges (numbers) appear on **Shipments** and **Alerts** when items need attention.

Chapter 4

Shipment Register

The Shipment Register is the central list of all temporary import and export movements. Navigate here via **Shipments** in the sidebar.

Figure 4.1 — Shipment Register with all active shipments

4.1 Search & Filters

Use the search bar to find shipments by description, reference, invoice number, or customs reference. Apply dropdown filters to narrow results:

- Country — filter by origin or destination country
- Segment — filter by business unit (Drilling, Frac, WL, ESG, TRS, etc.)
- Movement Type — Temporary Import or Temporary Export
- Status — Open, Extended, Closed, etc.
- Alert — filter by urgency level (Overdue, Urgent, Plan ahead, etc.)

4.2 Table Columns

Column	Description
#	Auto-assigned shipment number
Segment / Description	Business unit and a short description of goods
Route	Origin country → Destination country
MOT	Mode of transport icon (Land, Sea, Air)
Customs Ref.	Bayan / customs declaration reference number

Deposit (USD)	Customs deposit amount held
Import Date	Date goods were imported / movement started
Effective Expiry	Current expiry date (strikethrough = original date before extension)
Owner	Assigned user or team responsible for this shipment
Status	Current badge: Open, Open-Extended, Closed, etc.

■ Click the **chevron ›** at the far right of any row to open the full shipment detail view. The total customs deposit on view is shown in the sub-header below the page title.

4.3 Shipment Detail View

Clicking the chevron on any shipment row opens the full detail page for that shipment. This page is divided into tabs and panels:

Figure 4.2 — Shipment detail page (Overview tab)

Tabs:

- **Overview** — shipment information, customs deposit & duty exposure, key dates, notifications and recipients
- **Documents** — all attached files organised by document type
- **Timeline** — chronological history of events and status changes
- **Compliance** — compliance-specific checks and flags

Right-side panels on the Overview tab:

- **Days to Deadline** — countdown to effective expiry with a visual progress bar
- **Key Dates** — imported date, original expiry (shown with strikethrough if extended), and extended-to date
- **Notifications** — shows whether alerts at 60, 30, 14, 7 days before and past expiry have been sent or are queued
- **Notification Recipients** — lists all people notified on alert changes, with their role (e.g. Supply Chain Manager, Logistics Manager). Click **Edit** to update recipients

4.4 Updating Shipment Status

From the shipment detail page, click the **Update Status** button (top-right corner) to change the status of a shipment. The fields shown in the dialog depend on the status selected.

When the current status is Open or Open – Extended:

The screenshot shows the 'Update Shipment Status' dialog for a shipment with ID 'KSA-003' and current status 'Open - Extended'. The dialog contains the following fields:

- New Status ***: A dropdown menu currently showing 'Open - Extended'.
- New Extended Expiry Date ***: A date input field showing 'mm/dd/yyyy' with a calendar icon. Below it, a note states: 'Updated re-export deadline after extension approval'.
- Extension Notes**: A text area with the placeholder 'Optional remarks...'.
- REQUIRED DOCUMENTS**: A section containing a field for 'Customs Approval – Email *' with a '+ Add file' button. Below this field, it says 'No files attached yet.'.

At the bottom of the dialog are two buttons: 'Cancel' and 'Save changes'.

Figure 4.3 — Update Status dialog (current status: Open / Open – Extended)

- **New Status *** — select the updated status from the dropdown (required)
- **New Extended Expiry Date *** — enter the updated re-export deadline after extension approval
- **Extension Notes** — optional remarks about the extension
- **Customs Approval – Email *** — attach the customs approval email (required)

When the current status is Closed:

Update Shipment Status

KSA-003 Closed

Closed - Refund Recovered

Refund Amount (USD)

0.00

Original deposit: \$7,294.90

Refund Date *

mm/dd/yyyy

Notes

Optional remarks...

REQUIRED DOCUMENTS

Deposit Receipt * + Add file

No files attached yet.

Cancel Save changes

Figure 4.4 — Update Status dialog (current status: Closed)

- **New Status *** — select Closed – Refund Recovered from the dropdown (required)
- **Refund Amount (USD)** — enter the refund amount received; the original deposit is shown below for reference
- **Refund Date *** — enter the date the refund was received (required)
- **Notes** — optional remarks
- **Deposit Receipt *** — attach the deposit receipt as a required document

Click **Save changes** to apply, or **Cancel** to discard.

4.5 Shipment Status Types

Every shipment carries one of four statuses. Understanding these is essential for compliance tracking:

Status	Meaning
Open	Shipment is active and within its original customs expiry period
Open – Extended	Shipment is active and the customs expiry has been officially extended beyond the original date
Closed	Shipment has been re-exported or resolved; no longer active
Closed – Refund Recovered	Shipment is closed and the customs deposit has been successfully refunded

■ The status badge is visible on both the Shipment Register list and the detail page. Use **Update Status** to progress a shipment through these stages as customs actions are completed.

Chapter 5

Alerts & Notifications

The Alerts page provides an automated, priority-sorted list of shipments grouped by urgency. Alerts are calculated based on **effective expiry dates** (i.e., after any extensions granted).

Figure 5.1 — Alerts & Notifications page

5.1 Alert Severity Buckets

Level	Colour	Timeframe	Required Action
Overdue — escalate now	Red	Past deadline	Escalate immediately. Penalty risk.
Urgent	Orange	Within 7 days	Submit extension or initiate re-export
Action required	Yellow	Within 14 days	Begin extension paperwork / schedule re-export
Plan ahead	Blue	Within 30 days	Confirm re-export plan with operations
Monitor	Teal	Within 60 days	Informational only — no action yet

5.2 Email Notifications

When a shipment crosses one of the alert thresholds, the assigned notification recipients automatically receive an email from the NESR TI-TE Compliance Portal. Emails are triggered at the following intervals before expiry:

- 60 days before expiry
- 30 days before expiry
- 14 days before expiry

- 7 days before expiry
- Past expiry

Figure 5.1b — Example expiry alert email received by notification recipients

Each alert email includes:

- **Alert banner** — clearly shows the urgency level, e.g. 'Expires TOMORROW', with the expiry date highlighted in orange
- **Shipment Details** — reference, description, movement route, country, expiry date, and customs deposit amount
- **Action Required** — reminds the recipient to review the shipment and contact the logistics team if an extension or closure is needed
- **View Shipment button** — links directly to the shipment detail page in the TI/TE platform

■ Alert badges on the sidebar Alerts menu item update in real-time. A red badge means at least one shipment is in the Overdue or Urgent bucket. Do not reply to notification emails — they are automated and unmonitored.

Chapter 6

Map View — Active Movements

The Map View gives a global overview of all active shipment flows. An interactive map is coming in a future release; currently the page displays a **Flows by Route** summary table.

Figure 6.1 — Map View with route summary table

6.1 Flows by Route Table

Column	Description
Route	Origin → Destination country pair
Count	Number of active shipments on this route
Status Mix	Colour-coded bars showing the distribution of alert statuses
Total Deposit (USD)	Sum of all customs deposits for that route
Worst Alert	The highest-urgency alert level among shipments on this route

■ The interactive map (showing shipment pins and active route lines) will be available in the next platform release. Until then, use the route table to understand geographic exposure.

Chapter 7

Audit-Ready Reports

The Reports page provides pre-built, audit-ready reports for customs, finance, and legal teams. All reports can be exported as **PDF** or **Excel** in one click.

Figure 7.1 — Audit-Ready Reports page

7.1 Report Summary Cards

Four KPI cards at the top of the Reports page show:

- Total Active Deposit (USD) — cumulative customs deposit across all open shipments
- Refunds Initiated YTD — total deposit refunds in the current year
- Penalty Risk Exposure — USD value at risk from overdue shipments
- Re-export Completion % — closed shipments vs all-time total

7.2 Available Reports

Report Name	Category	Contents
Monthly customs summary	Customs	All open & closed movements — Bayan, deposit, expiry, status
Finance — duty exposure roll-up	Finance	SAR/USD deposit by segment, country, and aging bucket
Legal — penalty risk register	Legal	Overdue & at-risk shipments with extension status/timeline
Re-export confirmations	Customs / Finance	Closed shipments with re-export docs and refund status
Extensions log	Customs	All extensions requested and granted, original vs effective expiry
Audit trail — full history	All	Append-only change log for every shipment, event, and user

■ Use the **PDF** button to share reports with stakeholders, and **Excel** for further analysis or data manipulation. Both exports include the same underlying data.

Chapter 8

Adding a New Shipment

To log a new temporary import or export movement, click the green **+ New shipment** button (top-right corner of the Dashboard or Shipment Register). The form is divided into 8 sections.

8.1 Section 1 — Movement Details

Shipment register / New shipment

Add new shipment

Log a new temporary import or export movement.

1. Movement Details

Operating country *

Select country..

Type

Temporary ImportTemporary Export

Segment

e.g. Drilling, E&P..

Description

Brief description of goods or equipment..

2. Route

From country

Origin country

To country

Destination country

Mode of transport

Select MOT..

3. Customs & Documentation

Invoice number

INV-..

Invoice value (USD)

USD 0.00

Customs Reference Number

Customs reference or declaration number

AWB / B/L number

Airway bill or bill of lading

PO number

Purchase order #

Figure 8.1 — New shipment form: Sections 1–3

Complete the following fields:

Field	Details
Operating country *	The country where the customs movement is taking place (required)
Type	Select Temporary Import (goods entering) or Temporary Export (goods leaving)
Segment	Business unit — e.g. Drilling, E&P, Frac, WL, ESG, TRS
Description	Brief description of the goods or equipment being moved

8.2 Section 2 — Route

- **From country:** Origin country of the goods
- **To country:** Destination / operating country

- **Mode of transport (MOT):** Land, Sea, or Air — select from dropdown

8.3 Section 3 — Customs & Documentation

- **Invoice number:** Supplier invoice reference (INV-...)
- **Invoice value (USD):** Total declared value of goods
- **Customs Reference No.:** Bayan / customs declaration number
- **AWB / B/L number:** Airway bill or bill of lading number
- **PO number:** Internal purchase order reference

8.4 Section 4 — Dates

4. Dates

Import / movement date Expiry date *

mm/dd/yyyy mm/dd/yyyy +180d

☐ Extension granted

5. Deposit / Financial

Customs Deposit (USD)

\$ 0.00

6. Notification Recipients

These people will be notified when this shipment's alert status changes (overdue, urgent, etc.)

DEFAULT RECIPIENTS

Select a country above to see default recipients.

ADDITIONAL RECIPIENTS

Add anyone else who should be notified.

+ Add recipient

Figure 8.2 — New shipment form: Sections 4–6

- **Import / movement date:** Date the goods entered or left — uses calendar picker
- **Expiry date *:** Required. The official customs expiry date (required)
- **Extension granted:** Toggle on if customs has already approved an extension

8.5 Section 5 — Deposit / Financial

Enter the **Customs Deposit (USD)** — the monetary deposit held by customs as security. This feeds directly into the dashboard KPI cards and financial reports.

8.6 Section 6 — Notification Recipients

These recipients will receive automated alerts when this shipment's status changes (e.g. moves to Urgent or Overdue). Two groups are available:

- **Default Recipients:** Pre-configured per country in Settings (shown automatically once you select Operating country)

- **Additional Recipients:** Click **+ Add recipient** to include anyone else who should be notified for this specific shipment

8.7 Section 7 — Additional Info

7. Additional Info

Comments

Additional notes, conditions or remarks...

8. Required Documents

All five document types are required. Files are uploaded after the shipment is saved. Maximum 10 MB per file.

Commercial Invoice * + Add file

No files attached yet.

Packing List * + Add file

No files attached yet.

Customs Docs * + Add file

No files attached yet.

Customs Inspection Report * + Add file

No files attached yet.

Customs Approval – Email * + Add file

No files attached yet.

Cancel ✓ Save shipment

Figure 8.3 — New shipment form: Sections 7–8 and save

Use the **Comments** field to add any additional notes, conditions, or remarks about this shipment that are not captured in the structured fields above.

8.8 Section 8 — Required Documents

All five document types below are mandatory. Files are uploaded after the shipment is saved. Click **+ Add file** next to each type to attach (max 10 MB per file):

- **Commercial Invoice**
- **Packing List**
- **Customs Docs**
- **Customs Inspection Report**
- **Customs Approval — Email**

■ Once all sections are complete, click the green **Save shipment** button at the bottom-right. The shipment will immediately appear in the register and the Dashboard will update.

■ Clicking **Cancel** will discard all entered data. Make sure to save before navigating away.

Quick Reference

Task	How to do it
View all shipments	Sidebar → Shipments
Add a new shipment	Dashboard or Shipments → + New shipment (top right)
Check urgent alerts	Sidebar → Alerts (check red/orange buckets)
Export a report	Reports → choose report → PDF or Excel button
Filter by business segment	Shipments → Segment dropdown filter
See deposit by route	Map View → Flows by Route table
View shipment detail	Shipments → click chevron › on any row
Check compliance health	Dashboard → donut chart (right side)
